unanimous in having Langston proceed with getting bids on a 24x50 portable building at HGH to help relieve some of the crowded conditions.

Langston had received an estimate of \$22,500 for a building constructed to the hospital's specifications.

The trustees asked the administrator to check with all regulatory agencies to make sure it is legal.

Some of the services which could be moved would include the data processing, all physical therapy, and several other functions to give HGH the necessary room to handle the increased medical services.

Trustees were elated over the census increases during November and the first part of December compared with 1980.

The daily census for November 1981 was 36 compared to 28 for the same month in 1980.

December's census to date was given at 33 compared to 24 for 1980.

Mike Hallford, HGH comptroller also reported November's collections increased \$100,000 over 1980's, with much of it being attributed to the higher census.

The recent increase of doctors on the medical staff is one of the reasons for the census increase.

Upon recommendations by the medical staff of HGH, the trustees approved Dr. William Hill as transferring from consulting to active staff status.

Dr. Samuel Robinson was named as a member of the consulting staff, and Dr. Catherine Lundy, psychologist, as an allied health specialist.

A unanimous vote was given on the entering of a contract for 24-hour-a-day emergency room doctor's coverage effective Jan. 1, 1982.

The emergency room is now covered by a doctor.

The cost for the 24-hour coverage would be \$25 per hour according to Hallford who said the present coverage figures are \$31 an hour when you figure insurance.

When the Visitors Center re-opens Jan. 4, new presentations and films will be featured during normal hours of operation from 9 a.m. until 5 p.m. NSTL's four programs include indoor and outdoor exhibits, guided tours, special lectures and demonstrations conducted by Visitors Center personnel," he explains.

A MERRY CHRISTMAS—Alida Burr and her two children Billy Ray and Glenda of Shoreline Park find their Christmas presents intact at the Hancock County Sheriff's Department recently. The gifts were stolen from their house last week, but department officials recovered all the presents and also arrested a Louisiana man for burglary of a dwelling in the process. A Louisiana juvenile is still being sought in connection with that theft. (Staff photo Brent Macey)

## Presents returned to family

By BRENT MACEY

What could have caused a very sad Christmas for Alida Burr and her family of Shoreline Park turned out to be only a scare, thanks to efforts of the Hancock County Sheriff's Department.

Problems started when Burr and her two children left their home at approximately 10 a.m. recently to go to the post office.

Upon their return only a short time later, they found a window of their front door broken and their house apparently had been entered.

Although the family's stereo and color television had not been touched, Burr found that all the Christmas presents she had bought and stored under a bed were missing.

Several days later, the Hancock County Sheriff's Department received an anonymous tip of where the presents could be located.

As a result, investigator Delbert Seay and Deputy Dennis Tartavouille

arrested Jessie B. Billot of 2219 Delisle Street in Chalmette, La. for burglary of a dwelling.

Billot was placed in the Hancock County Jail under \$3,000 bond.

According to Seay, Billot allegedly gave the stolen presents to his girl friend in Shoreline Park.

"He told her he had bought the presents for some relatives, but they didn't want them," Seay said.

Billot's girl friend allegedly took the presents back to the store where they were originally purchased and exchanged them for other gifts.

COURTROOM BATTLE—Participating in a Thursday night Hancock County Circuit Court hearing in which Amanda Penrose of Wayland was successful in her lawsuit against the City of Bay St. Louis seeking \$112,000 for auto repairs resulting from her car hitting potholes in the city are, from left, Aaron Adams, a Wayland attorney representing Penrose, Penrose and her infant daughter, Judge John C. Chevis Jr. of Bay St. Louis. (Staff photo by Wayne Ducomb Jr.)

### Lawsuit.....

Johnson reported the city 'implements steps immediately to remedy dangerous street conditions by undertaking repairs or placing warning barricades.

The superintendent said he was not aware of any dangerous conditions on the two streets in the months that the accidents occurred.

He said one or two trucks with work crews regularly patrol the city to spot holes and fill these with 'whatever material is available' which includes asphalt, clam shells or clay gravel.

"It's common after a heavy rain to have many potholes in the streets," Johnson reported.

"Our crews usually cover all the streets within two or three days," he stated.

Johnson said his workers usually do not inform him of a street problem unless it is relatively serious.

Favre testified he was not aware of any dangerous conditions on the two streets, but that numerous repair patches are found on Beach Boulevard.

Gex requested that all charges be dropped against the city and argued that the department is only required to provide 'reasonable care' of the streets and was not aware that dangerous conditions existed on the streets.

He also charged that it is a driver's responsibility to avoid road hazards.

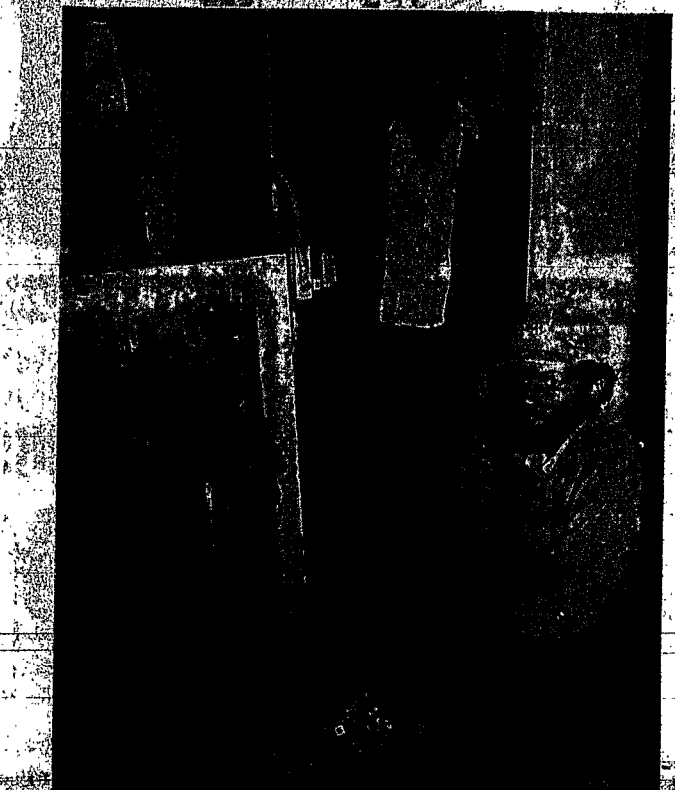

Adams argued the city should have discovered and repaired the defects and Penrose could not avoid hitting the Beach Boulevard cavity because she

was dodging another hole at the time of the mishap.

The Wayland attorney charged negligence on behalf of the city and said, "The city should take reasonable care in detecting defects and maintaining the streets."

"Either the speed limits posted are improper or some warning system be installed to notify drivers of hazardous road conditions," he stated.

REBUILT BOILER—Journeyman Doyle Chandler, left and second year apprentice Herman Simmons, of Ray G. Weavers of Gulfport work repairing a boiler in the new building at Gulfview Elementary School. Potential fire hazards due to incorrect installation of the boiler after a tornado struck the school in May of 1980 were discovered last week. Before the boiler could be turned on, safety devices had to be installed and other parts of the boiler rebuilt to meet Mississippi Liquid Petroleum Gas Code standards. Tuesday the school was closed due to anticipation of cold front in the area. Workmen installed the final part that day and the boiler is now operating correctly. Ed Fylenx, a Hancock County arson squad investigator, has been assigned the Mississippi Chief Deputy Fire Marshal the task of inspecting all Hancock Schools for fire hazards. He said the Deputy Fire Marshall commended the Gulfview Principal William Haddock for the 'overall good condition of the school.' (Staff photo by Brent Macey)

## Ducks Unlimited chapter sets annual meet

The Hancock County Chapter of Ducks Unlimited will stage its fourth annual banquet Monday at Trapani's Shamrock Room in Waveland. Social hour begins at 6:30 p.m. with dinner slated for 7:30 p.m. and program at 8:30 p.m.

Chateau Bleu of Slidell, La. will cater the dinner, according to Chris Lagarde, chapter president.

Highlighting the program will be auction of eight signed and numbered prints by selected artists who participated in Ducks Unlimited's stamp art competition this year.

A new shotgun will also be awarded during the program. Chapter Treasurer Wade Stevens said membership dues of \$10 must be paid for admittance. Dinner tickets are an additional \$10, he added.

For information, call Stevens at 467-2350.

Ducks Unlimited was founded in 1937 to help restore and rehabilitate prime waterfowl breeding grounds in Canada, where over 70 percent of North America's waterfowl are hatched.

These grounds were nearly destroyed as a result of the sudden and massive westward expansion of civilization after World War I and the subsequent draining and cultivation of the land.

The severe drought of the 1930s also contributed to the decline of continental waterfowl populations.

Since its inception, DU has completed more than 2,000 wetland restoration projects. These projects have benefited man as well by creating a stabilized water supply for agriculture, industry and municipalities.

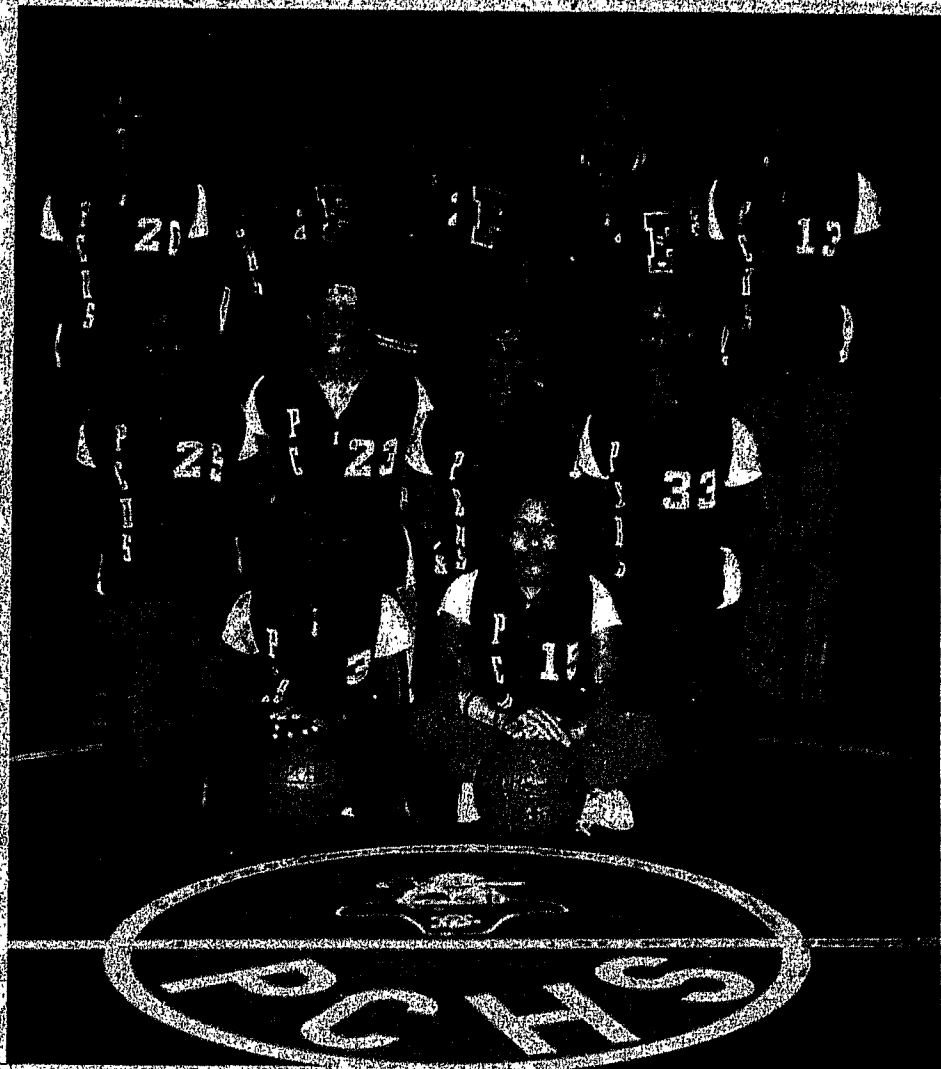

More than \$134 million has been raised in DU's 43-year history, nearly \$100 million of which has been spent on wetland improvement and management.

This means that almost 60 cents of every dollar contributed to DU goes directly into project construction.

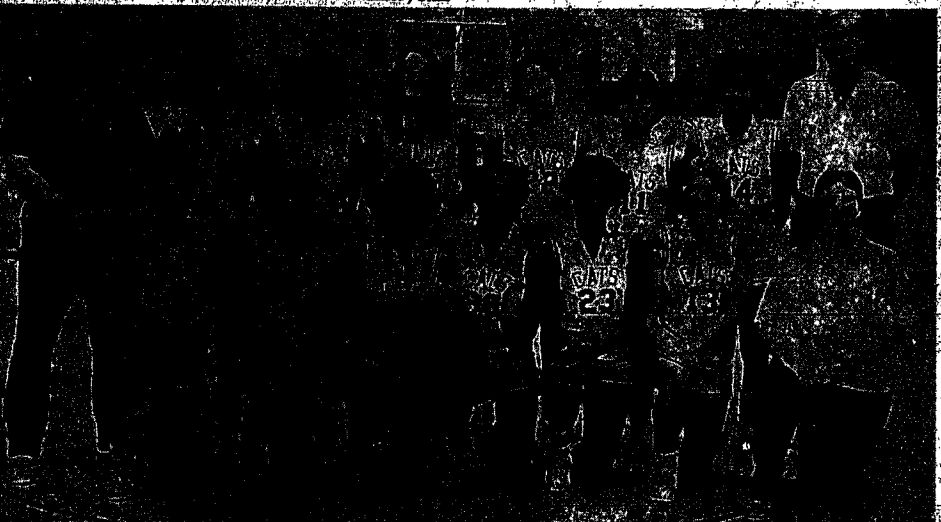

Presently, DU membership stands at approximately 365,000, many of whom have been enrolled by the over 1,700 DU committees nationwide. DU's Greenwing program, initiated in 1973 for boys and girls under the age of 18, now boasts a membership of well over 24,000.

DU has reserved almost 3,000,000 habitat acres which provide nearly 12,000 miles of vital nesting shoreline for waterfowl, while at the same time offering refuge to hundreds of other species of wildlife.

In 1980 DU raised over \$25 million for wetland habitat restoration and has set a \$30 million goal for 1981.

THE LADY WILDCATS of Pearl River Junior College in Poplarville will try to repeat as youth division champions this year with a host of talented freshmen and transfer players. Already the 1981-82 Lady Cats are 6-2 and will face action again on Jan. 9 at Jones Junior College. Members of the team include, front from left, Vickie James, Hancock; Devri Morgan, Poplarville; Phyllis Favors, Dalagerfield, Tex.; Willie Jean Briggs, Waldo, Ark.; Christine Fairly, Hattiesburg; Marian Brandt, Slidell, La.; (back row) Ned Eades, assistant head coach; Rose Mary Lofton, Bassfield; Sharon Williams, Purvis; Sheila Ladner, Hancock; Jill Ottaviano, Nevada City, Calif.; Shelly Dedeaux, Hancock; Glenda Gardner, Spring Creek, La.; and PRC head coach Billy Holmes.

## Participating schools slighted in bowl ticket allocations

Answering inquiries regarding seating for Mississippi State University alumni and fans at the College Football Hall of Fame Bowl game in Birmingham, Dec. 31, Percy J. Baker, assistant athletic director for business, explained the bowl's ticket allocation.

MSU's tickets began at the 10-yard line in the east stands, extending through the curve in the north stands. Students were assigned seating in the lower section, through row 41. The other seats were allocated according to highest priority, according to Baker.

Those who were disappointed in

this allotment, but were assured by Hall of Fame Bowl officials that Kansas' (the Bulldogs' opponent) would have the same seating at the opposite side of Legion Field.

Baker pointed out that last year at the Sun Bowl in El Paso the seats allocated MSU were located on a more favorable yard line but Mississippi State fans were split in four different areas of the stadium and many of the seats were low and fans had a poor vision of the playing field.

It is quite apparent most bowls use the best tickets for bowl sponsors and stadium

very few good tickets to the competing schools," Baker reported.

Mississippi State, the third place team in the Southeastern Conference, faces Kansas, the third place team in the Big Eight Conference, in the fifth Annual Hall of Fame Bowl game, Dec. 31.

Coach Emory Bellard's Bulldogs, who finished the regular season with a 7-4 record, are going to a bowl game for the second consecutive season. Kansas ended its season with a win over Missouri, giving the Jayhawks an 8-5 record.

**CRUDE OIL REACTOR**—The first of six 1,000-ton RDS crude oil reactors is being hoisted into place at the Chevron Refinery in Richmond, Calif. by Brown & Root, Inc., the prime contractor. General Manager, Sargent & Lundy, is on a \$1 billion Chevron USA Feedstocks Refinement Conversion Project. Two special devices used for the lift were designed by Brown & Root. One is the 17-ton high steel tower weighing 350 tons with a 1,200-ton capacity gallows frame cradle at the top. The other is the falling device at the bottom of the reactor foreground, which moves forward on the transporter during the lift until the reactor clears the anchor bolts and is positioned on the pedestal.
